

WeRateDogs

ACT_REPORT

By Hadiya Usman

Introduction

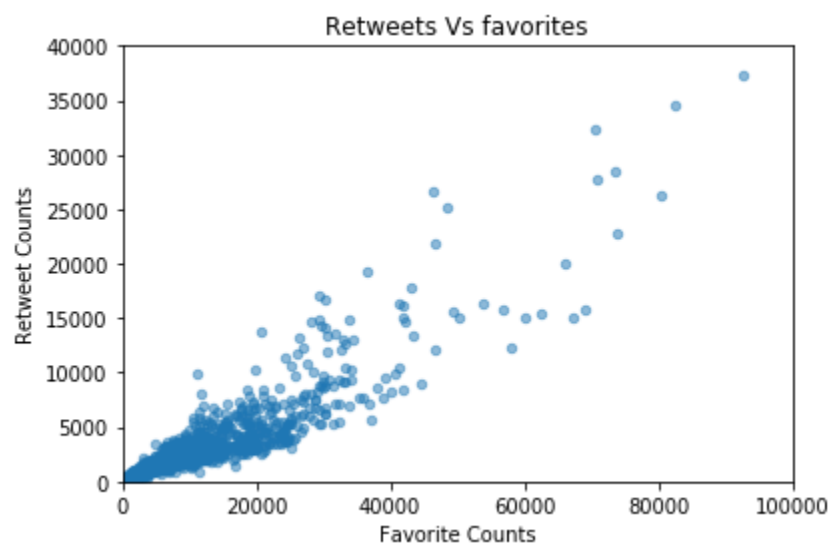

The dataset I used for this wrangling (and analyzing and visualizing) is the tweet archive of Twitter user [@dog_rates](#), also known as [WeRateDogs](#). WeRateDogs is a Twitter account that rates people's dogs with a humorous comments about the dog. WeRateDogs has over 4 million followers and has received international media coverage.

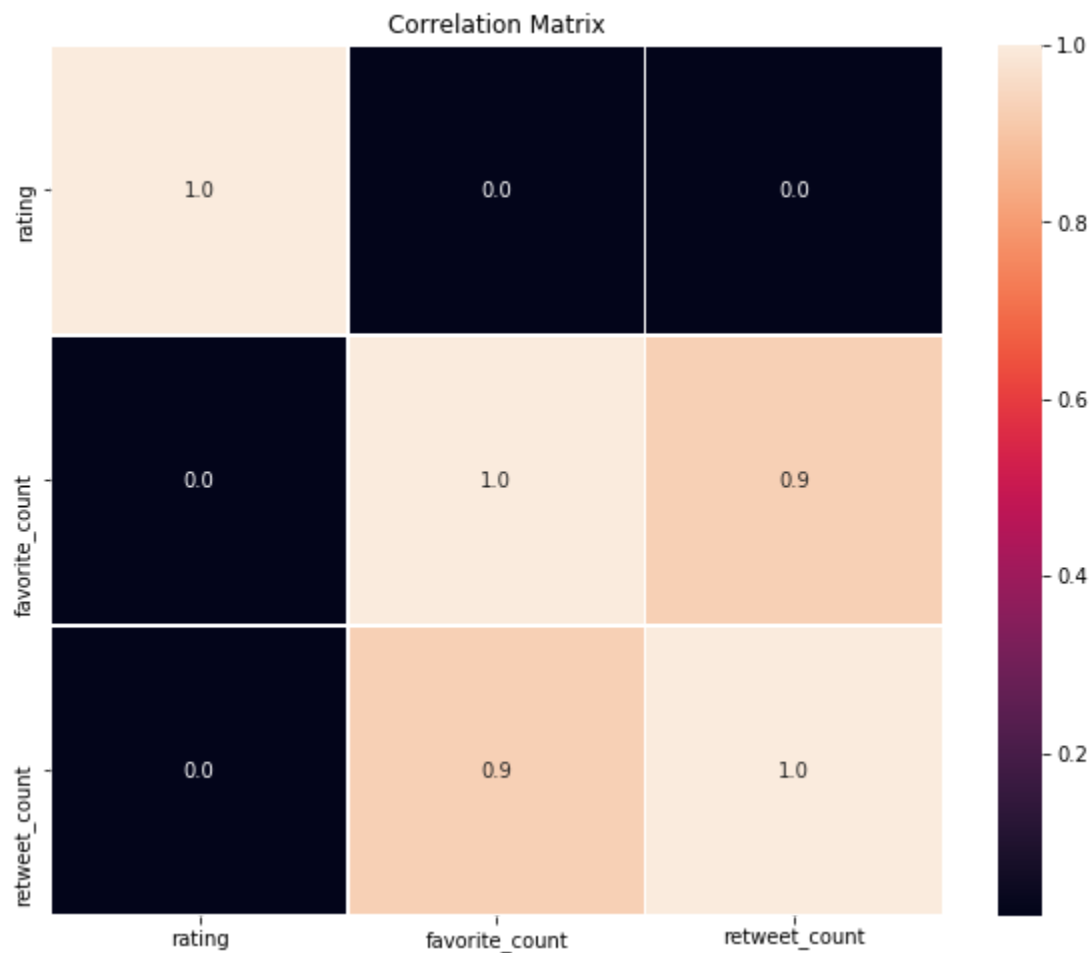

With this massive number of followers, I was curious to find out the most popular breed of dog with the most engagement? Is there a relationship between Retweet counts and Favorites counts?

I used python libraries to wrangle and analysed the data to answer the questions also with the bits of help of other learners I was able to get through with the project.

1. Are the WeRateDogs retweet_count and favorite_count correlated?

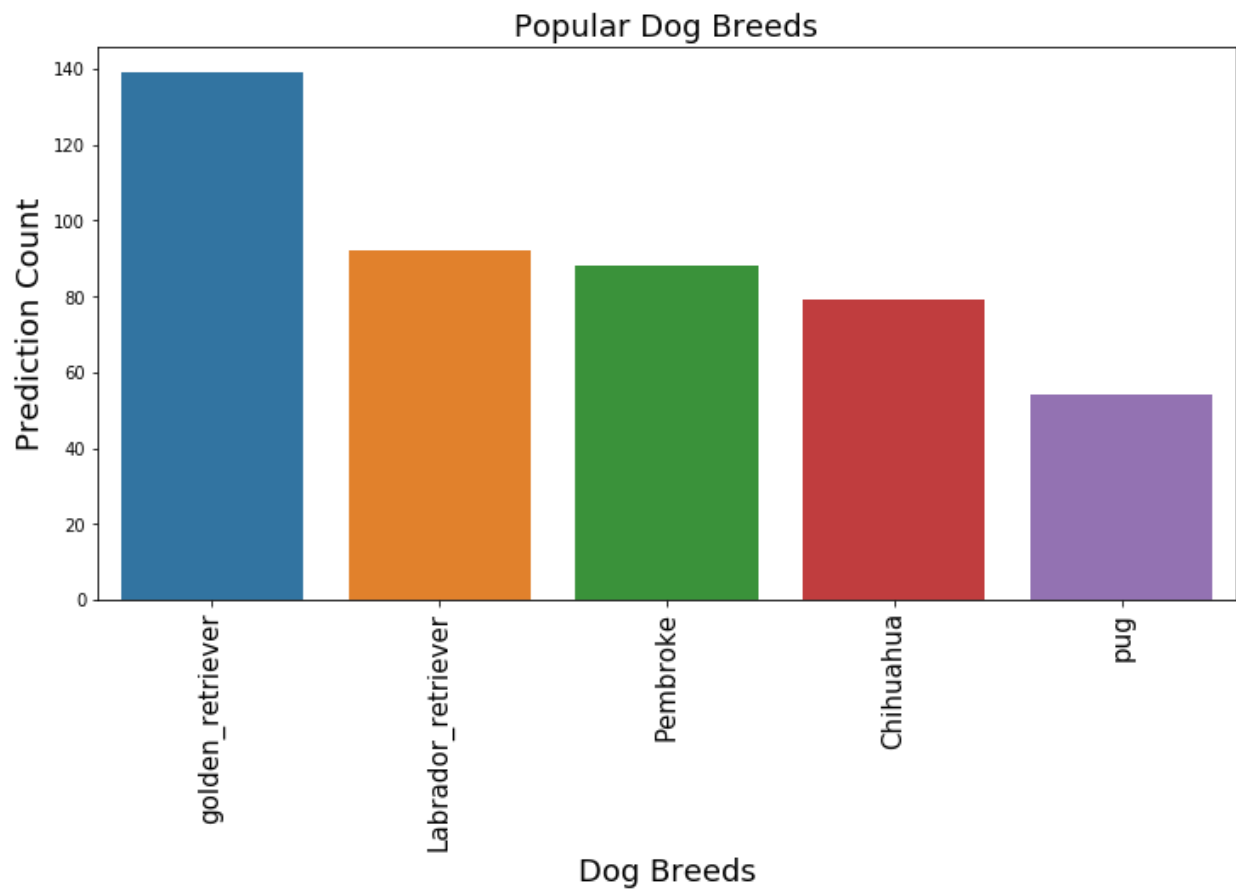

There is a very strong correlation between retweet_count and favorite_count

2. Whats are the most popular dogs tweeted about

There are 5 top most popular dogs and Golden_retriever is the most popular dog followed by Abrador_retriever and Pembroke.

What are the most popular stages of Dogs

The most famous stage of Dog is **Doggo**.
